PROFESSIONAL SUMMARY

Over the past 4+ years, I have built and scaled robust digital solutions across major sectors and industries, including Fintech, EdTech, Health, Socials, and Sports. My daily work centers around leveraging modern programming stacks, frameworks, and libraries across the JavaScript & TypeScript ecosystem to engineer high-performance web and mobile applications. Additionally, I architect decentralized applications (dApps) and secure smart contracts in Web3 on the Sui blockchain using Sui Move.

EDUCATION

Achievers University, Owo, Nigeria

Bachelor of Science (B.Sc.) – Computer Science

WORK EXPERIENCE & KEY PROJECTS

FUOYE E-Election Platform (NUNSA Departmental Election)

July 2026 – August 2026

Lead Full Stack Engineer

- Architected a multi-level digital voting platform for 520+ voters across 5 academic cohorts using Node.js, Express, Next.js, and MongoDB Atlas with atomic ledger verification to eliminate double-voting.
- Integrated AWS SES REST API over HTTPS for automated, rate-limited bulk OTP passcode dispatches.
- Built an AI Facial Verification Engine enabling email-restricted voters to submit selfie scans for manual committee approval.
- Created an admin dashboard (Next.js, TailwindCSS) featuring real-time voter segmentation, live search, one-time self-destructing OTP display, and instant voter updates.
- Executed zero-downtime data migrations for 500+ records, seamlessly updating student email directories and syncing database rosters.

Stack: Node.js, Express.js, Next.js (App Router), MongoDB Atlas, AWS SES, AI Biometrics | **Live:** fuoyenunsaelection.online

Loopay (Fintech Company)

Sept 2025 – July 2026

Full Stack Developer

- Solely managed and maintained a live payment infrastructure system.
- Debugged and resolved real-time transaction and payment reconciliation issues.
- Successfully migrated users from legacy Paystack integration to a new payment architecture without data loss.
- Improved system stability and reliability through backend optimizations.
- Upgraded React Native (Expo) mobile app, resolved dependency conflicts, and deployed updates to the Apple App Store.

Stack: React Native, Expo, Node.js, Express.js, Paystack API | **Live:** loopay.otbvalley.com

Allshop Platform

Nov 2025 – August 2026

Full Stack Developer

- Built a location-based eCommerce platform connecting users to nearby plazas and commercial stores.
- Developed full backend architecture in Node.js/Express and led frontend logic using Redux state management.
- Built fully functional seller/buyer dashboards, payment integrations, and live order tracking.

Stack: React, Redux, Node.js, Express.js, REST APIs | **Website:** allshopplatform.com

BayLeague (Personal Project)

April 2026 – August 2026

Founder / Full Stack Developer

- Developed a tournament management platform implementing Round Robin fixture algorithms and live match statistics.

Stack: Next.js, Node.js, TypeScript, MongoDB | **Live:** bay-league.vercel.app

Belocated LTD, Abuja, Nigeria

Oct 2024 – Feb 2026

Full Stack Developer (Mid-level)

- Enhanced web application for advertising social media handles and built native mobile apps for Android and iOS users.

Stack: React Native, Node.js, Express.js, MongoDB | **Live:** belocated.ng

Hezeohams (Client Project)

Oct 2025 – Dec 2025

Full Stack Developer

- Built custom eCommerce platform with admin product management and seamless customer purchase workflow independently.

Stack: Next.js, Node.js, Express.js, TailwindCSS | Website: ogboss.com.ng

Freeman Standard School , Akure, Nigeria

Nov 2022 – Feb 2023

Result Portal Developer

- Built student result portal, automated credential generation, CBT exam system, and financial tracking dashboard.

Stack: PHP, MySQL, JavaScript, HTML/CSS | Live: freemanstandardschoolikare.sch.ng

TBTicketwave , Owo, Nigeria

Mar 2024 – Apr 2024

Full Stack Developer (Mid-level)

- Designed web-based Voting & Ticketing System with Paystack payment integration and real-time tracking analytics.

Stack: Next.js, Node.js, Paystack API | Live: tbticketwave.com.ng

SKILLS & QUALIFICATIONS

Full Stack: Next.js (App Router), React.js, Node.js, NestJS, TypeScript, JavaScript

Frontend: React, Next.js, TypeScript, TailwindCSS, Redux State Mgmt

Backend: Node.js (Express), NestJS, REST APIs, Microservices, JWT Auth, AWS SES

Blockchain & Web3: Sui Move, Smart Contracts, dApps, Sui CLI & Bytecode

Mobile & AI: React Native (Expo), AI Biometrics (Face Verification)

Databases & Cloud: MongoDB Atlas, DigitalOcean, Git, Vercel, Railway, Postman

CERTIFICATIONS

- The Complete Fullstack Web Development Bootcamp – Udemy
- Frontend Development Certificate – Programming Hub
- SEO Certificate – Programming Hub
- Full Stack Developer – Wetindeycode Academy
